

Waste Management Report

## Waste Management Report Installation of Interim Emergency Treatment Liquid-Phase Granular Activated Carbon Units

## Aqua New York, Inc., Seamans Neck Road Water Plant, NWIRP Bethpage, New York

## Contract N62470-08-D-1006, Task Order WE23

DATE: July 16, 2012

This memo is being provided as a record of the Waste Management for the above referenced project.

Attached please find a description of waste generated on the project from Darr Construction, dated June 20, 2012. This letter also indicates disposal facilities.

Due to the nature of this project, there was very little construction debris generated. Also attached is the Navy Waste Product Management Spreadsheet with estimated quantities of waste generated and disposed of.

**Graham Sharkey**

RE: SEAMAN NECK ROAD MODIFICATIONS MATERIAL REMOVAL & DISPOSAL

To whom it may concern:

This letter is to inform you of the final destination of the materials trucked from the site.

All of the topsoil that was removed was dumped at CB Recycling where it was screened to be resold.

One (1) dumpster of mixed material was removed and dumped at CB Recycling where it was sorted.

The trees, brush and wood was processed into mulch.

The metal fence was brought to a scrap yard for recycling in Deer Park.

Sincerely,

Roy Cannetti

RC:amj
